DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group 1 in the reply filed on October 14, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

1. The abstract of the disclosure is objected to because it too long. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Urda et al., U. S. Patent 6,205,691.

3. Urda et al teaches a sign comprising light diffusion layer 20 having front and back faces; means lighting 32 disposed close proximity to the

light diffusion layer 20; and masking layer 18 covering least a portion the front face of the light diffusion layer 20 and having cut outs defining at least one character or symbol said sign.

4. With respect to claims 6 and 31, the masking layer or blocking layer is completely opaque. See column3, lines 60-63.

Allowable Subject Matter

5. Claim 26 is allowed.

6. Claims 3-6, 7-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following U. S. Patents are cited to show signs with diffusion layers and masking layers: Pedersen – 4,796,170 and Plumby – 4,967,317.
